

Imperial Logistics

Renier Engelbrecht, Financial Director – Imperial Logistics Africa Division

Imperial Logistics provides a full service of supply chain solutions from warehousing and distribution to freight and transport.

I've recently moved to the Africa Division, but at the time of engaging the services of the FD Centre, I was the Financial Director of the Transport and Warehousing Division. In 2015 a division in our company needed assistance on certain matters. One of the CEOs that I work with has used the FD Centre before so I approached them for help.

It was the first time that I had used the FD Centre and I was impressed with Yolande Jansen's CV that they presented to me. Yolande joined us full time from March to July 2015. She was required to troubleshoot on two main challenges specifically – resolving a complex debtor's account and invoicing issue, and managing a stock balance issue in one of our warehouses. She also provided general support to the MD.

Yolande had extensive experience and this meant that she was able to hit the ground running and start solving problems quickly. Having her as part of the team allowed the MD and the FD of the division to get on with the more pressing business matters they were faced with at the time.

Based on the positive outcome of this placement, I will definitely use the FD Centre again.
